

Protect Communications

Protecting you where work happens

A New World of Risk

Security teams today face a new world of risk. Work environments transformed overnight and became exponentially more complex as a result. And new ways of working have driven mass adoption of communications and collaboration tools, reducing control and making employees more vulnerable than ever. The work surface is now your risk surface.

At Mimecast, we believe organizations shouldn't have to choose between productivity and security. Our fully integrated Email Security solutions, powered by the Mimecast X1 Platform, protect you where work happens, delivering best-in-class security for the top attack vector – email – and reducing risk, cost, and complexity at every organization's most vulnerable point: the intersection of communications, people, and data.

Control Risk

When it comes to keeping communications, people, and data secure, perhaps no area is more critical than email. This key communications tool is the entry point for the majority of attacks – attacks designed to cripple your business, target vulnerable employees, and compromise the data you are entrusted to protect. The growing sophistication and volume of email-based threats mandate a solution that's as agile, intelligent, and scalable as the methods deployed by those who seek to do you harm. Enter Mimecast. **We turn email security into the eyes and ears of your organization.**

Block all email-based threats with AI-powered detection

As the leader in email security for 20 years, Mimecast offers industry-leading detection and world-class efficacy trusted by 40,000 customers globally. By applying the right detection capabilities at the right time, Mimecast Email Security surrounds your communications with continuous protection to block the most sophisticated threats, from phishing and ransomware to credential theft and zero-day threats. The industry's most robust view of the email threat landscape – derived from Mimecast's inspection of 1.3 billion emails daily – powers instantaneous blocking of the vast majority of email-based attacks, while the latest in AI and Machine Learning provides intelligent detection of both emerging and unknown threat types.

Partner with the experts at securing M365 and Google Workspace

Mass adoption has increased attackers' focus on productivity platforms like M365 and Google Workspace. The best defense is a layered approach that can block attacks designed to evade native security defenses. Offering unparalleled expertise in protecting these environments, Mimecast is your must-have email security and resilience companion for M365 and Google Workspace.

- 27K+ customers who use Mimecast alongside M365
- Seamless integration with M365 and Google Workspace
- Fast, easy integration with Azure Sentinel
- Simple to create custom queries and analytics
- Unified administration console

Accelerate detection and response with fast, easy bi-lateral threat sharing

As the top attack vector, email is a goldmine of information that can be used to accelerate detection and response. That's why Mimecast makes it simple to share threat intelligence with your other security solutions. Thanks to our open API, integrating Mimecast with solutions like SIEM, SOAR, CASB, and XDR is fast and easy, opening up endless opportunities to accelerate detection, reduce manual effort, and optimize security investments.

Control Complexity

Attackers are relentless, and their sophistication will only continue to grow. How has the security industry responded? By applying an array of technologies designed to keep attackers at bay. The result is often a complex web of systems, an overwhelming volume of alerts, and security teams that spend more time managing technology than risk. At Mimecast, we believe that world-class security and simplicity don't have to be mutually exclusive.

Simplify security with fully-integrated, complementary solutions

One attack vector, one problem – what if that was all you had to solve for? You have to do more, so Mimecast does more too. Our Email Security solution suite lets you address a wide range of needs from single, fully integrated platform.

Social Engineering Defense

Empower users with AI-driven warning banners surfaced and updated in real time based on risk.

DMARC Management

Get full visibility and control of who sends emails on your behalf by accelerating and simplifying implementation of the DMARC protocol.

Insider Risk Protection

Prevent attacks from spreading internally and to your supply chain by applying best-practice inspections to internal and outbound email.

Continuity

Keep email flowing in the face of planned or unplanned downtime with easy to manage, intuitive continuity capabilities.

Message Encryption

Let users securely send sensitive information with message encryption that's easy for them to use and simple for you to administer.

Looking for best-in-class protection for your data and your people?

Ready to Get Started?

Let's find the right solution for you.

World-class email security, total deployment flexibility.

No two organizations are alike. That's why Mimecast gives you the best email protection in the industry, with two different deployment options designed to meet varying requirements. Whether your environment is large or small, complex or straightforward, well-resourced or lean and mean, Mimecast delivers world-class email security efficacy in the way that best meets your needs.

Which solution is right for you?

Email Security, Cloud Integrated - coming soon

An Integrated Cloud Email Security solution that does not require an MX record change, Email Security, Cloud Integrated is purpose-built to enhance and extend M365 protections. Deploying in just minutes and providing optimized protections out of the box, it's the ideal solution for IT and security teams that want to bolster M365 protection while making email security administration a snap.

- Optimized M365 protections
- Deployment in minutes (no MX record change)
- Protection for a single email tenant
- Out-of-the-box settings
- Minimal configuration
- Simplified administration
- One-click remediation
- Extensibility through an open API

Email Security, Cloud Gateway

A Secure Email Gateway in the cloud, Email Security, Cloud Gateway is designed to keep any type of email environment, even the most complex, secure. Offering advanced administration capabilities and a broad range of complementary solutions and integrations, it's the ideal solution for IT and security teams that want to control risk while also taming complexity.

- Optimized protections for any email environment (M365, Google Workspace, hybrid, on-premise)
- Support for large and complex environments (FAA, AAA)
- Highly customizable policies
- Simplified integration with other security tools, such as SIEMs, SOAR, TIP, XDR, and more.
- Integrated, complementary solutions (Continuity, Archive, DMARC, and more)
